New repository
Type / to search
Create a new repository
A repository contains all project files, including the revision history. Already have a project repository elsewhere? Import a repository.
Required fields are marked with an asterisk (*).
Owner *
Repository name *
swiftlydesigner
/
Great repository names are short and memorable. Need inspiration? How about
congenial-octo-computing-machine ?
Description (optional)
Public
Anyone on the internet can see this repository. You choose who can commit.
Private
You choose who can see and commit to this repository.
Initialize this repository with:
Add a README file
This is where you can write a long description for your project. Learn more about READMEs.
Add .gitignore
.gitignore template: VisualStudio
Choose which files not to track from a list of templates. Learn more about ignoring files.
Choose a license
License: None

Git GUI:

- Github Desktop [Windows/macOS]
  - https://desktop.github.com/
- SourceTree [Windows/macOS]
  - https://www.sourcetreeapp.com/
- Git Kraken [Windows/macOS/Linux]
  - https://www.gitkraken.com/download

- Built-in to Visual Studio and other IDEs

Git CLI

- macOS
  - Use Homebrew if it is not installed. (website: brew.sh)
  - /bin/bash -c "$(curl -fsSL https://raw.githubusercontent.com/Homebrew/install/HEAD/install.sh)" ; brew install git
  - Homebrew is a good thing to have anyways.
- Linux
  - sudo apt-get install git-all [Debian/Ubuntu]
  - sudo dnf install git-all [Fedora]
  - https://github.com/git-guides/install-git
